March 13, 2013

University of Wisconsin - Madison
School of Social Work

Social Work 952, Ph.D. Proseminar in Applied Quantitative Data Analysis
Spring 2013 Syllabus
Monday 9:00-11:30, Social Work 114

Professor: Lonnie Berger
Email: Lberger@wisc.edu
Offices: 311 Social Work (263-6332) and 3442 Social Science (262-6379).
Office hours: by appointment

I. Description

The course focuses on giving graduate students skills in applied quantitative data analysis. This course fulfills a requirement for a seminar in applications of research methods for the PhD in social welfare and is open to advanced MSW students and interested graduate students from other departments with instructor consent.

II. Objectives and overview

The course is built around each student completing a quantitative research paper on a topic of their choosing; ideally, the paper will be submitted for publication in a peer review journal after completion of the course. It has the following objectives: (1) to increase students' knowledge of methodological problems and issues faced in applied quantitative research; (2) to give students hands-on experience in all phases of a quantitative analysis research paper, from the proposal to selecting data and methods, to analyzing results, to writing the paper; (3) to introduce students to a variety of statistical techniques that may be appropriate for their future research; and (4) to give students experience in presenting their own research and acting as a discussant for the research of peers.

Course activities consist of: (1) joint reviews of students' proposals for their papers, as if the class were a review panel; (2) an overview of selected quantitative analysis approaches and methods; (3) ongoing discussions of topics that arise while doing quantitative research; and (4) class presentations of final papers with discussants, as if the class were a professional conference session.

This course is most relevant for students who have two of the following in place: (a) a research question; (b) familiarity with a dataset that can be used to answer the question, and (c) statistical programming skills. The instructor will provide a dataset if a student needs one.

III. Texts and reading material

There are no required textbooks. Required readings will be posted on the class web site at Learn@UW or available from the web. However, I highly recommend that you include one or more of the following texts in your library:

General Advanced Statistics Texts

**Writing about Quantitative Analysis**

See Jane Miller’s website for pdfs, videos and other material: [http://policy.rutgers.edu/faculty/miller/](http://policy.rutgers.edu/faculty/miller/)

**General Stata Texts**

**IV. Assignments and evaluation**

**Grades:** 45% final paper and preliminary products; 10% discussant for peer paper; 45% homework and class participation. This is a graduate seminar; the expectation is that the seminar will provide a collaborative learning environment. Academic honesty is a central requirement for graduate study. Please review the School of Social Work guidelines on plagiarism – (p. 32-33 of [http://socwork.wisc.edu/files/PhDProgramGuidelines.pdf](http://socwork.wisc.edu/files/PhDProgramGuidelines.pdf). If a student intentionally misrepresents another’s work as their own, the student will receive no credit for the assignment and a final semester grade no higher than a C.

**Final paper and preliminary products:** The final product will be a 20-30 page research paper that uses quantitative analysis. The paper should include a discussion of the significance of the research question, a literature review, a description of data and methods, specific hypotheses that are tested, quantitative results, limitations, and conclusions and next steps. The paper is due at 9 a.m., May 13.

Several preliminary products will be required, including:
- a one-page proposal abstract: this should include ~2 sentences on why your topic is important, a statement of the research question, including the dependent variable and key independent variables and 1-2 sentences on the data you’re planning to use, the sample, and the main statistical method (about 1 page in total) **due February 1**.
- a working proposal, including a discussion of the significance of the research question, a very brief literature review, data, methods, and limitations (maximum 5 single-spaced pages without references), **due February 22**.
March 13, 2013

- A memo that describes whether (and how) the final paper will differ from the proposal abstract, due March 22. Also on March 22 you have the option of turning in a draft of the introduction and literature review and receiving feedback on these sections.

- A draft final paper (due Friday at noon the week before the presentation)

Discussant for peer paper: the last weeks of the course will be a mock conference, with students presenting papers and acting as discussants. Information on the discussant role, as well as more detail on all preliminary products, will be distributed.

Homework: There will be three homework assignments. These will be focused on each student’s project; for example, one assignment will be to provide a cross-tabulation between the student’s dependent variable and their key independent variable, and a very short discussion of what they learned.

Class Participation: Because much of the learning occurs during the class time, students are required to attend every class or to receive approval in advance for not attending. In addition, students are expected to have carefully and critically read all assigned readings, and to be prepared to discuss them.

V. Expectations of Students and Instructor

Students are expected to:
- attend each class session (or receive approval in advance for non-attendance), actively participate in the in-class discussions. (If you cannot attend class, you are not only responsible for gaining permission in advance, but also for knowing what occurred and getting any handouts).
- carefully and critically read all required readings before coming to class
- complete all assignments by the due dates and times (thus you are expected to plan your life so that you can make the required deadlines in the course)
- inform the instructor during the first week of the semester of any special accommodations needed for meeting class expectations (as approved by the McBurney Center)
- be respectful of other class members—a diversity of views and opinions may be articulated during discussions.

The instructor is expected to:
- assure that course objectives are being met
- be available to students by appointment and to answer questions through email during business hours
- give reasonable guidance on preparing for assignments
- be open to discussing concerns about the course
- evaluate and return assignments in a timely manner.

VI. Course content, with readings (tentative)

Class 1, January 28: Overview of course

One-page proposal abstract due Friday, February 1, noon.

Class 2, February 4: Mock review panel 1: of the abstracts submitted, which ones should we invite to submit a more detailed proposal?

Read all one-page proposals
Readings on what makes a good proposal (see Learn@UW)

Class 3, February 11: Descriptive analyses and measurement issues

Stock & Watson, Chapter 1: Economic Questions and Data (pages 3-14).

**Class 4, February 18: From descriptive statistics to basic regression**

IF NECESSARY:

Studenmund, Chapter 1: Introduction and Overview of Regression Analysis (p. 1 – 24).

Studenmund, Chapter 4: The Classical Model (p. 93 – 110).

*Working proposal due Friday, February 22, noon*

**Class 5, February 25: Mock review panel 2: evaluating all working proposals**

Read all working proposals

*Homework 1 (on variable construction) due Friday, March 1, noon*

**Class 6, March 4: Typical difficulties in conducting empirical research (based on homework 1)**

To be announced

CLASS 7-10 We will work together select a series of analytic techniques or issues to highlight during these sessions.

**Class 7, March 11: Technique I**

Joe Glass: guest lecture on Structural Equation Modeling

**Readings:**

March 13, 2013

Discussion of how to choose an identification strategy, using class projects as examples

IF NECESSARY:

OPTIONAL: Homework 2 (on relationships between independent and dependent variables) due Friday, March 15, noon

Class 8, March 18: Technique II

Ashley Woodman: guest lecture on small sample analytic strategies (ANOVA, MANOVA, ANCOVA, MANCOVA)

Readings: None

Maria Cancian: guest lecture on fixed-effects and random-effects regressions

Reading:

*Introduction, theoretical framework, and literature review due Friday, March 29*

March 25: SPRING BREAK

Class 9, April 1: Technique III

To be announced

*Homework 3 (results draft) Friday, April 5, noon*

Class 10, April 8: Technique IV

To be announced

CLASS 11-14 FEATURE STUDENT PRESENTATIONS IN A MOCK CONFERENCE. Papers are due by Friday at noon the week before the presentation. Each student is required to read all the papers that will be presented every week. Each student will be assigned to be a formal discussant of one or more papers.

Class 11, April 15: Mock conference I

Laura – reviewed by Emily
Andrea – reviewed by Eun Ha
Tricia – reviewed by June
March 13, 2013

Class 12, April 22: Mock conference II
Emily – reviewed by Vanessa
Sarah – reviewed by Kristy
June – reviewed by Andrea

Class 13, April 29: Mock conference III
Vanessa – reviewed by Sarah
Kristy – reviewed by Tricia
Eun Ha – reviewed by Laura

Class 14, May 6: Any remaining presentations or techniques; brunch

FINAL PAPER DUE MAY 13
Alumni and Friends
- Must be Full-Time or Part-Time MSW Student
- Must be in Generalist Year
- Must include an answer in “if applicable, please discuss any challenges or barriers...”

Beebe Scholarship
- must be a Full-Time or Part-Time MSW Student
- must check “serious and persistent mental illness” as an area of interest

Dibble Scholarship
- Must be Full-Time or Part-Time MSW Student
- Must include an answer in “if applicable, please discuss any challenges or barriers...”

Lockwood Memorial Award
- must be a Full-Time or Part-Time MSW Student
- must be in Advanced Practice Year
- must check “alcohol and other drug abuse” as an area of interest

Schwert Scholarship
- must be a Full-Time MSW Student
- must check “criminal justice” as an area of interest
REVIEWER INSTRUCTIONS

1. Briefly describe this applicant's financial need
   [Text box with 100 word limit]

2. Briefly describe this applicant's fit for the _____ Scholarship/Award
   [Text box with 200 word limit]

In light of your responses to the above questions, please rate the applicant according to the following scale:

1. Poor candidate for the _____ scholarship/award
2. Marginal candidate for the _____ scholarship/award
3. Satisfactory candidate for the _____ scholarship/award
4. Very Good candidate for the _____ scholarship/award
5. Excellent candidate for the _____ scholarship/award
