Instructions for Evaluating Students on the Nine Competencies: Evaluation Component (Column 3)

The nine competencies specified in this evaluation form are those established by our national accrediting organization (the Council on Social Work Education). The student's learning plan has identified the learning opportunities (e.g., methods, activities, and assignments) available for the student to achieve these competencies. Under each competency statement are several indicators, i.e., behaviors, which we ask you to rate, according to the following criteria, based upon their performance of the measurable methods of achievement (the observable learning opportunities). Students demonstrate mastery of a set of behaviors tied to practice competencies that are related to the mission and goals of social work in the field placement. Students gain experience and focus on skill development in their field placements related to the behaviors associated with the competencies.

5	The student has excelled in this area.
4	The student is functioning somewhat above expectations for students in this area.
3	The student has met the expectations for students in this area.
2	The student is functioning somewhat below expectations for students in this area.
1	The student is functioning significantly below expectations for students in this area.
N/A	Not applicable, as the student has not had the opportunity to demonstrate competence in this area.*

Comments may be made under any competency statement, if desired. Please be sure to indicate those areas in which you think the student is particularly strong and those areas in which the student needs improvement. For the latter, please note specific strategies for making improvement or indicate that these will need to be identified during the three-way (agency supervisor, student and field faculty) evaluation meeting.

This evaluation is intended to give the student feedback about their performance. Students are expected to indicate if there are areas they do not understand and/or with which they do not agree. For the fall semester evaluation, the rating is based on what the student has accomplished to-date and how well they have accomplished it in terms of expectations, at that time, for achievement of the behavior. The spring end-of-semester rating indicates the "outcome" in terms of achieving the behavior. For the generalist level student, the desired outcome is that of entry-level generalist social work practitioner. The Field Faculty will determine the student's grade based on their overall evaluation of the student's performance in the field placement in conjunction with performance in the integrative seminar.

***Note: The N/A rating is only applicable for the fall semester final evaluation.**

Generalist Practice Year Competencies, Behaviors, and Evaluation

Competency 2.1.1

Demonstrate Ethical and Professional Behavior.

Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgment and behavior. Social workers understand the profession's history, its mission, and the roles and responsibilities of the profession. Social Workers also understand the role of other professions when engaged in inter-professional teams. Social workers recognize the importance of life-long learning and are committed to continually updating their skills to ensure they are relevant and effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice. Social Workers:
