Fall Public Child Welfare Dialogue
with
Emily Putnam-Hornstein, Ph.D.

Friday, November 6, 2015
10:00am—12:00pm
Union South, check TITU

Emily is an assistant professor at the University of Southern California's School of Social Work and director of the Children's Data Network, university-agency collaborative focused on the linkage of administrative data to inform children's policies and programs. She also maintains a research appointment at the UC Berkeley California Child Welfare Indicators Project— a longstanding child welfare data and research collaboration with the California Department of Social Services. Emily's current research focuses on the application of epidemiological methods to improve the surveillance of non-fatal and fatal child abuse and neglect. Her research provides insight into where scarce public resources may be most efficiently targeted and informs understanding of vulnerable children within a broader, population-based context.

The Public Child Welfare Training Program operates with federal funds made available through Title IV-E of the Social Security Act, which provides specified financial support for students committed to a career in public child welfare. Dialogue attendees who require accommodations should contact portier@wisc.edu as soon as possible.
